PROFESSIONAL EXPERIENCE

Product Manager Apr 2024 – Dec 2024
Kite Games Studio | Dhaka, Bangladesh

- Managed the development and launch of the Beauty Editor-Face Retouch app, a photo editing tool with face filters, delivering seamless functionality and a user-friendly experience for App Store users worldwide.
- Spearheaded growth initiatives, driving a 10% increase in customer acquisition across key regions (USA, UK, Japan) through data-driven marketing strategies and user focused product enhancements.
- Conducted in-depth competitor research to identify innovative features and strategies, successfully implementing them to enhance user engagement and boost retention rates.
- Optimized App Store listings through ASO strategies and coordinated with the product team, over 10+ developers, and QA specialists to ensure smooth delivery of features.

Product Manager Oct 2023 – Feb 2024
Fashol Dotcom Limited | Dhaka, Bangladesh

- Directed the development of the Smart Shelf, an AI-driven automated vegetable shelf, merging hardware and software for a seamless user experience.
- Led a 5-member team, including backend, frontend developers, and a QA specialist, to refine the prototype and resolve technical challenges during the pilot phase.
- Designed and executed a market launch strategy based on extensive research and surveys, enhancing product adoption in B2C markets.
- Collaborated with senior management and Singapore-based investors to align technical prerequisites with business objectives, emphasizing inventory systems and IT efficiency.

Product Specialist Jun 2021 – Sep 2023
Shuttle Technologies BD | Dhaka, Bangladesh

- Served as Product Owner for the Shuttle Partner App, developing an MVP for the registration flow that reduced onboarding costs by 40% and streamlined the driver enrollment process.
- Introduced features like Driver's Earnings, reducing payment processing times by 50%, and implemented On-Demand ride requests, cutting backup failure rates by 5%.
- Designed the Partner ERP system to automate vehicle requests and weekly bill disbursements, increasing team efficiency by 20% and reducing manual workload by 50%.

- Oversaw the design and deployment of an internal Customer Acquisition System, achieving 60% operational efficiency and reducing costs by 10%.
- Increased lead generation by 35% through the integration of online marketing channels and implemented an acquisition funnel that boosted conversion rates by 20%.

PROJECTS

Beauty Editor : Face Retouch Kite Games Studio

Type: Photo Editing Application

- Led full-cycle product revamp of this app from market & user research to final release, improving core user retention by 21% through redefined onboarding, enhanced UI, and feature prioritization based on analytics and feedback.
- Owned cross-functional collaboration with UI/UX, engineering, QA, and marketing teams - defined product requirements, managed agile sprints in Jira, coordinated daily standups, oversaw QA testing, and incorporated stakeholder feedback into release-ready builds.
- Developed and executed go-to-market strategy including app store optimization (ASO), marketing asset coordination, and post launch analytics tracking, resulting in a 23% uplift in downloads and five-star average app rating within 3 months of release.

Users: Google Play Store Users Worldwide

Partner App Shuttle Technologies BD

Type: Ride Sharing App (For Drivers Only)

- Spearheaded the end-to-end development of a new Driver App - conducted market/user research, interviewed drivers, defined user flows, and created a robust feature roadmap for a 360-degree earning platform to expand trip requests and rental services.
- Collaborated cross-functionally with UI/UX, engineering, and QA teams - wrote detailed PRDs, managed agile workflows via Jira, led daily standups, and ensured timely delivery of milestones through rigorous sprint planning, testing cycles, and stakeholder reviews.
- Launched the Driver App with a targeted go-to-market strategy, aligning with operations and marketing teams to ensure regional rollouts, app store optimization, and in-app communication - achieving 40% faster onboarding, three times engagement growth, and improved driver satisfaction scores.

Users: Registered Drivers of Shuttle

Partner ERP Shuttle Technologies BD

Type: Driver Management System (Web)

- Automated vehicle requests, boosting team efficiency by 60%.
- Real-time backups, minimizing critical zone by 1%.
- Automated weekly bill disbursement, reducing the workforce by 50% and increasing effectiveness, efficiency by 80%.
- Collaborated with five software developers and a QA professional to complete this project.
